

# SEC Checker™

Simpler, Faster, Smarter SEC Research

Easy searching and simplified filtering

## Simplify Your SEC Research Tasks

The SEC Checker is the ground-breaking solution for practitioners and research professionals who need to quickly and efficiently search, retrieve and analyze SEC filings and related documents. The SEC Checker stands out first and foremost by its easy-to-use interface. In addition, advanced analytics and comparison tools help you to pinpoint only the most relevant precedents.

The SEC Checker pulls together all publicly disclosed SEC filings and related documents. Using our patent-pending processes, we've organized, reformatted, and indexed all of this information – enabling you to search, filter, compare, copy, and assemble content for internal or client review.

**The result: an easier and faster way to find the most on-point disclosure information**

### Simpler

Search, filtering and retrieval options are straightforward and intuitive

### Faster

Our retrieval engine is optimized to find information quickly and display the results in a well-organized and logical manner

### Smarter

Identify the most relevant results using the SEC Checker's built-in smart links, unique comparison tools and powerful alerting options

## SEC Checker Gives You:

**Easy Searching:** Find documents through full-text searching, filtering and home page links

**Simplified Filtering:** Streamlined filter options make it easy to find information across various filing types

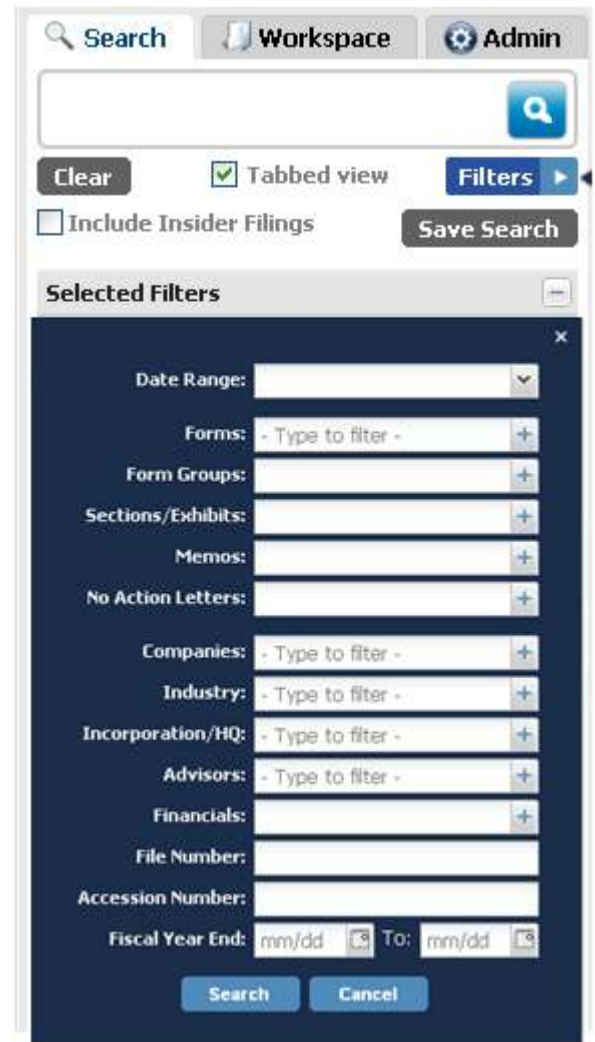

**Enhanced Company Information:** At any point, use the "Info" button to quickly view any company's filings, financials and a list of their competitors, directors and insiders

**Powerful Compare tools:** Compare year-over-year changes to similar disclosure and amended filings

**Unique Identifiers:** Alerting you to filings that have been subsequently amended and/or received SEC comments

**Simple Implementation:** Deploys easily via a software-as-a-service (SaaS) model; there's no software to install or maintain

**Cost Recovery:** Captures usage and client number for billing

Smart links identify amendments and SEC Comments
